

# When The Sun Don't Always Shine

Sawyer Brown

I hope this day is good, hoping I might find the way  
To take the rain and wash the blue away  
You never know when the time might turn around  
And now I sit here, thinking this might be the day

When the sun don't always shine on the same face all the time  
I'll wait my turn, as I live and learn  
I won't fall too far behind when the sun don't always shine

I've got two good hands, the name my daddy gave to me  
Got a willing heart, a little faith is all you need  
And there I go, thinking I can face tomorrow  
I won't hang my head, 'cause love goes on and on

When the sun don't always shine on the same face all the time  
I'll wait my turn, as I live and learn  
I won't fall too far behind when the sun don't always shine

Always shine, always shine  
When the sun don't always shine on the same face all the time  
I'll wait my turn as I live and learn  
I won't fall too far behind when the sun don't always shine  
Always shine, always shine
