

# Eyes On The Highway

Saybia

Dawn is breaking, in a ray of light  
The world still frozen from a cold, cold night  
The Northern Star flickers, then let's go of the fight  
I still orbit the words you say  
Your promise of harmony and better days  
Honesty, that's what it is  
A lag of honesty, that's what it is

You keep  
Your eyes on the highway  
Your eyes on the highway  
Your eyes on the highway  
Eyes on the highway  
You keep  
Your eyes on the highway  
Your eyes on the highway

Humble but proud I get back on my feet  
Driven by an engine's irresistible beat  
And let harmony float towards where you and I meet  
I've got my head held high and the sun in my face  
I'm still part of this magnificent race  
Where honesty is all I need  
A little honesty is all I truly need

To keep  
My eyes on the highway  
My eyes on the highway  
My eyes on the highway  
My eyes on the highway  
My eyes on the highway  
Eyes on the highway  
To keep  
My eyes on the highway  
My eyes on the highway

For me it's sometimes hard to define  
What is yours and what is mine  
Just tell me the truth and you'll be free  
Just look at me, just look at me

You keep your  
Eyes on the highway  
Your eyes on the highway  
Your eyes on the highway  
Your eyes on the highway  
You keep  
Your eyes on the highway  
Your eyes on the highway  
You keep  
Your eyes on the highway  
Your eyes on the highway

Just tell me the truth and you'll be free  
Just look at me, just look at me
