

I left a coffee out for you
'Cause when I wake up I make two
It's just something that I do
Because it makes me feel closer to you
It makes me feel closer to you

Why are you so far from me
I wish that somehow I could be
Next to you tonight
Where everything's alright
Why are you so far from me
So far from me

I left a cigarette outside
To help you make it through the night
It's just something that I do
Because it makes me feel closer to you
It makes me feel closer to you

Why are you so far from me
I wish that somehow I could be
Next to you tonight
Where everything's alright
Why are you so far from me
So far from me

If you were a colour you'd be black and white
'Cause there's no in between
I just miss you tonight
If the whole sky was falling
I know I could hide in your arms

Why are you so far from me
I wish that somehow I could be

Why are you so far from me
I wish that somehow I could be
Next to you tonight
Where everything's alright
Why are you so far from me
