

Love Somebody

Schuyler Fisk

I think this could be a good thing,
We're in the right place, at just the right time
When I saw you unexpected,
There was nothing I could do to keep you off my mind

You could be just what I needed,
There's no mistaking this feeling,
Give it time, and you'll see
Your heart, it won't have to wander,
No, it won't need any other,
You'll be safe, here with me, yeah

Oh, it's just the way I feel,
I feel lucky

You always know the way to make my dark skies sunny,
Cause everything's better when you love somebody,
You always know the way to bring the best out of me,
Cause everything's better when you love somebody

Everything's better when you love
Somebody

I've been having trouble sleeping,
Can't wipe the smile off of my face
I could spend my life daydreaming,
Oh, all the memories we could make

Cause you take the weight off my shoulders,
You make me not even notice,
All the time is flying by
You make my heart start to flutter,
Now that we've found one another,
Everything just feels right

Oh, it's just the way I feel,
I feel lucky

You always know the way to make my dark skies sunny,
Cause everything's better when you love somebody,
You always know the way to bring the best out of me,
Cause everything's better when you love somebody

What's the holdup? What's the problem?
Just love somebody, love somebody
Cause we were put here, we were made
Just to love somebody, love somebody

Oh, it's just the way I feel,
I feel lucky

You always know the way to make my dark skies sunny,
Cause everything's better when you love somebody,
You always know the way to bring the best out of me,
Cause everything's better when you love somebody

Everything's better when you love

Somebody

Everything's better when you love somebody
