

Lie to Me

Seafret

Even in a crowded room
I'd recognise your perfume
I will always keep you in my heart

I feel it in the atmosphere
It's different when you're not here
I don't wanna let this fall apart

Always fighting for tomorrow

Lie to me
Give me time to make it better
I can't breathe
Tell me love will keep us together
You're giving up
You've had enough
Won't be long til it catches up with you

Every time I think about it I go cold
So I don't wanna think anymore
I don't wanna face the truth
I keep on coming back to you
Like a message in a bottle washed ashore

Always fighting for tomorrow

Lie to me
Give me time to make it better
I can't breathe
Tell me love will keep us together
You're giving up
You've had enough
Won't be long til it catches up with you

There's no use in running
You're changing your mind
Now the people are talking
There's no where to hide

There's no use in running
You're changing your mind
Now the people are talking
There's no end in sight

Always fighting for tomorrow

Lie to me
Give me time to make it better
I can't breathe
Tell me love will keep us together
You're giving up
You've had enough
Won't be long til it catches up with you

Only love will keep us together
You're giving up
You've had enough

Won't be long til it catches up with you, with you
