

Daylight Saving

Seal

Daylight save me all my head like I've had enough
Of all the changes I've been through lately

Daylight save me again 'cos I feel like giving up
On all of the places I've been to lately

You and I were like the weather
You and I, like sun and rain
White flag I surrender
Maybe now we'll find a way
But we're not still together

Daylight save me again 'cos I know I can't keep it up
With all the faces I see through lately
It's cold at night when I lie in bed
I'm not big enough to warm the space beside that you left me

You and I were like the weather
You and I like sun and rain
We deny it when you're loosing me I'm loosing you
Maybe now we'll find a way

But we're not still together
We're not the same
'Cos nothing lasts forever

Been so long

You and I were like the weather
You and I like sun and rain
We deny it when you're loosing me I'm loosing you
Through the night into the break of day

Because its been so dark so long
I can't tell whats going on
Two hearts beat together
A single flame
But we're not still together

Like the rain
Been so long

Daylight save me all my head like I've had enough
Of all the blame I put on you lately
