If I'm Any Closer

I may dream of Who comes tumblin' out of the sky Trees beneath, sometimes I'm wonderin' if I've come too high

Did I forget My keys, my facts, my phone, my head And, oh, some cash, remind me

Darling, definitely I can hear you ask me why

Well, it could be This is all in my head Yes, it could be What I need lies ahead

If I'm any closer I will be here I can feel but I can't see To tell you the truth I'm not the only one Who's tried to find that key

I'm so loud that
I am climbin' out of my mind
Walls are crumblin'
I got out, I made it just in time

Well, it could be This is all in my head Yes, it could be Something we might have read

If I'm any closer I will be here I can feel but I can't see To tell you the truth I'm not the only one Who's tried to find that key

If I'm any closer I will be here I can feel but I can't see To tell you the truth I'm not the only one Who's tried to find that key

If I'm any closer I will be here I can feel but I can't see To tell you the truth I'm not the only one Who's tried to find that, tried to find that Tried to find that key
