

I'm made not created, but terrified
Having no soul, but it should be right
Livin' my virtual life
(I will try to seal my fate, artificial domination)
I'm feeling the lust of my prime delight
Gathering stories to mankind
Storybook's last page was found
(I go through the open mind, psychedelic lullaby)

I close my eyes in the coldest winter night
Sail back through my lonely life
Final tale to write

Can't you the blasphemy, human being's crying out loud
Empty words dying soul's hiding deep inside
Evermore we will all suffer from the lies we can't see
Is really the Earth as it's meant to be?
Reveal your own blindness, don't be so heartless
Symmetry can't be denied
(...you waste your time)

I'm spreading disease of enslaved minds
Biomechanic's no sci-fi
Killing with no alibi
(We are here to jail your fate, programming your DNA)
I start the age of endless multiplying
Deleting footprints of mankind
Here comes the ear of mine...
(Predestined to be my slave, never try to recreate YOU)

I close my eyes in the coldest winter night
Sail back through my lonely life
Final tale to write

Can't you the blasphemy, human being's crying out loud
Empty words dying soul's hiding deep inside
Evermore we will all suffer from the lies we can't see
Is really the Earth as it's meant to be?
Reveal your own blindness, don't be so heartless
Symmetry can't be denied
(...you waste your time)
