

Stranger in black

Secret Sphere

A stranger in black
Comes from the middle of nowhere
A secret unknown
A veil behind the people stare
Voices tell to runaway
After comes the sunset
Trying to speak but all escaping

What you're looking for?
What's the reason you're here
Runaway or die
A stranger in a town
You should have looked in the eyes
You can guess the truth
A shelter in the dark
A window light far

A house is through the fog
There must be someone in there
Behind the door there's something unexpected waiting
The people of the town is preying for all night long
They fear the forest 'cause they won't survive outside

What hides there
Our fear!
I am here to help you men
Light we'll see, soon again
You just live through darkness

Through the trees in the forest, there
I chase the shadow of the course
Through the trees in the forest, there
I see the sparkling eyes of demons

What hides there
Our fear!
I am here to help you men
Light we'll see, soon again
You just live through darkness
Darkness
