

# The Awakening

Secret Sphere

Hold me close, don't turn away...  
My need is your need, and I need you to stay  
Don't cut the wire, don't leave it just too tight  
Can change us a Chamaleon but never betray my spirit and soul  
Like water we can be everything everywhere

Finally free, anyone can rely on this  
Can't fall down no more, just dive and rise again  
Shipping the power with our looks and touch  
Listen to the voice within dancing in the twilight here and now

The awakening  
Time to change and heal the minds as a whole (our minds as a whole)  
Ain't looking for another fight  
Rolling down our lives free like we can control our destiny  
Here we go... Rise to it ... See our pockets still filled with chains , oh y  
eah  
Forget the numbers 'cuz we can feel when it's right  
we can feel when it's right, forget the numbers

Carved in stone... your name and a date is what remains  
Not for me, not for you... the awakening lives forever

So many ways to fire things up will lead us to our core  
we found the flow, we're feeling the hole inside  
Only time will tell the distance we create inside to find balance between he  
ad and heart

The awakening  
Time to change and heal the minds as a whole (our minds as a whole)  
Ain't looking for another fight  
Rolling down our lives free like we can control our destiny  
Here we go... Rise to it, drawing shapes and colors around our brains  
Open the right side and you can still have it all

(Memories can give us the answers)  
reaching to the awakening  
like going thru the needle's eye  
memories can give us the answers  
When I open my eyes you'll see we have all become blind  
counting tears that came alive  
No crying for tomorrow, enjoy what's yet to come  
we're starting our fears down, they look so small, so little from here  
Uh, those little fears... no crying for tomorrow

The awakening  
Time is change and heal the minds as a whole (our minds as a whole)  
Ain't looking for another fight  
Rolling down our lives free like we can control our destiny  
Here we go... Rise to it... See our pockets still filled with chains, oh yea  
h  
open the right side and you can still have it all  
you can have it all, you can have it all.
