

## A Million Suns

## Secrets of the Moon

For this do we pray  
Bearer of light  
For this do we pray  
This heart-shaped sun is thine

Behold  
Water to blood  
Drink from the acid chalice  
Invoke the glare  
Encasing my star  
Enlightening the one  
A million suns

Our mother was there  
To separate life from death  
Rex versus servus  
The love of the sun  
Our mother was there  
Raising the child  
Watching it die  
Her is the sun

For this do we pray  
Bearer of light  
For this do we pray  
This heart-shaped sun is thine

I drenched thee  
I crown  
So vile  
So detestable

I raped hearts  
I stuck it in  
So real  
In love

I spanked her  
i raped hearts  
Bleeding  
Let me in

This crown  
It's mine  
So vile  
So detestable

Don't spurn my children's legacy  
For their mothers cunt was bathed in faith  
Don't spurn my children's legacy  
For it bears the enragement of a million suns
