

Peace

Senser

(Breathe in, breathe out)
Water envelops my body
Joining beauty all around
Lace white forms float past me
In this new world I have found

How does nature create this
an art of love beyond dreams
I want to remain here forever
in this watery world of peace

Touching, drifting past me
Tails like feathers to my skin
Breaking the surface of water
Feeling warm the sun draws in

Blue lips glow in orange coral
Flick out of sight as I approach
Silver streams of water
searching in rocks
Like mercury, they touch me
