

Star Generation

September

We are moving
We stand united through the night
Somebody got the word out in the street
A Simple message spreading with the beat

We're losing it in London baby
Chicago's goin' crazy
Yeah, we're all moving with the star generation

We stand united in the center of life
We are the music of the star generation
We stand united through
Yeah, we're all moving with the star generation
We stand united in the center of life
We are the music of the star generation
We stand united through the night

They're singing it in Paris freaking out
They're running wild in Rio it's so loud
I can't make out this linea
Singapore to Cairo
We're all moving with the star generation

We stand united in the center of life
We are the music of the star generation
We stand united through
We're all moving with the star generation
We stand united in the center of life
We are the music of the star generation
We stand united through the night

Don't ever think it is over
Don't ever think you're alone

We are moving
We stand united through
We're all moving with the star generation
We stand united in the center of life
We are the music of the star generation
We stand united through the night
We stand united through the night
