

# Happily Ever After

Seraphim Shock

Waiting for the rain to come  
To wash away what we've become  
Screaming at the hypnotized  
Who still believe in history's lies  
On and on the sickness spreads  
One generation to the next  
Picket fence plastic life  
The ghost machine we breed inside

Your future your meaning your vision  
And when there is nothing  
You will save yourselves

Wasted jaded reason  
Broken hopeless puppets

Your future your meaning your vision  
And when there is nothing  
You will save yourselves

Happily ever after  
Happily dead inside  
Blindly wanting to believe in
