Don't Say Goodbye

Sérgio Mendes

Ауе уеуеуеуе уе уе уе уе уе уе уе

I see the wonder in your eyes Let the rhythm hypnotize Let it take your mind away Groove, let's get closer than before Let's imagine something more Then we'll make it real today

And don't say goodbye tonight Save that kiss for the mornin' light Till the sun comes up, we'll be lost in us Don't say goodbye The night was made for love, love

Oh, maybe you should lose your keys And your responsibilities They can wait another day Baby, the street's a danger zone Don't go out there all alone You'll feel better if you stay

And don't say goodbye tonight Save that kiss for the mornin' light Till the sun comes up, we'll be lost in us Don't say goodbye The night was made for love, love

La la la la la la la la

And don't say goodbye tonight Save that kiss for the mornin' light Till the sun comes up, we'll be lost in us Don't say goodbye The night was made for love, love Oh, if this night was made for two You know what we need to do Let me spend it all with you Let me spend it all with you
