Completely

I look into your eyes You turn away from me There must be something here You don't want me to see Cause when you're out with him You never hold his hand There must be something that I just don't understand

CHORUS:

I want you, you need me We fit all too completely I want you, to know that I need you to complete me

You should be here with me You need someone who cares You'll look to him for love but He just won't be there He'll only break your heart He'll hurt you in the end But I'll be waiting here I'll still be your best friend

CHORUS:

I want you, you need me We fit all to completely I want you, to know that I need you to complete me I want you, you need me We fit all to completely I want you, to know that I need you to complete me

BRIDGE:

Complete me 'Plete me yeah To complete me I need you to complete me 'Plete me yeah To complete me

CHORUS:

I want you, you need me We fit all to completely I want you, to know that I need you to complete me I want you, you need me We fit all to completely I want you, to know that I need you to complete me
