

Watch

Seven Places

The dust is settling now, I can see your expression
The look on your face is asking me howk how can you leave me here?
My words are falling to the ground, in one ear out the other
I'll just have to live it out

[Chorus:]

Watch these chains fall from my hands
Then you will understand, then you will understand.
Watch me walk through these prison bars
Then you will know my heart is free
Emptiness plagues you inside, you're surrounded by sorrow
It follows you where you hide, and exposes you every time
There is life beyond this crippling cage, and shelter from the
rage
Only you can decide...

[Chorus]

For the first time I'm alive
no longer pressed by doubt and fear
No longer drowning in my tears
He saved me from going under

[Chorus]
