

The apeman died 2001  
The ice is melting in the nuclear sun  
What a life, what a time to live in  
If your not a human being

What you doing, get a life, what you doing  
What you doing, get a life, what you doing

They've tagged my body, and bugged my brain  
You got the number don't need the name  
What a time what a place to live in  
If your not a human being

What you doing, get a life, what you doing  
What you doing, get a life, what you doing

No I'd never talk to strangers  
If I new of all the dangers  
But now they've gone and cloned the monkeys  
Life ain't gonna be so spunky

The apeman died 2001  
The ice is melting in the nuclear sun  
What a life, what a time to live in  
If your not a human being

What you doing, get a life, what you doing  
What you doing, get a life, what you doing
