When I Met You

Shane Filan

It starts off with a heartbeat
Then it hits you like a drum
You're deep down in a feeling
But it's only just begun
You're looking up at the ceiling
Wonder why you can't get to sleep
Coz you're deeper in that feeling
A feeling that nothing's ever gonna be
And I'll never ever know how I ever did without you

Whoa oh oh
Something's in life you can't forget
You know woo oh
I can't find the words I can't begin to tell you where, when, or how
All that I know now is that all my dreams came true,
When I met you
You o o
When I met you
You o o

It ends up in a moment
That takes your breath away
Yeah you can't even stop it
Baby somethings are meant to be that way
And I'll never ever know how I ever did without you

Whoa oh oh
Something's in life you can't forget
You know woo oh
I can't find the words I can't begin to tell you where, when, or how
All that I know now is that all my dreams came true when I met you
You o o
When I met you
You o o

You held my hand got me through
You took the old and made it new
I got it all as long as I got you
I got you

Whoa oh oh
Something's in life you can't forget
You know woo oh
I can't find the words I can't begin to tell you where, when, or how
All that I know now is that all my dreams came true
Oh oh oh
All my dreams came true
All my dreams came true
When I met you
You o o
Yeah when I met you o o
When I met you o o
When I met you o o
