Used to be, you and me, we had something Whats goin on, somethings wrong, your saying nothin
So let it out, scream and shout, it'll eat you up inside
Let it rain, share the pain, start
Communicating, yeah
Dont face it on your own

Let it all fal down

Let it all fall down on me

Let it all fall down

Down on me yeah

Have a little faith in me

And let it all fall down on me

Now you know, this world is so, full of Heartache Your not alone, together I know we can make it Let me share the load, Im ready to go

This world try to take what you got Anytime ready or not In the end it's up to you Keep on punchin till you break through

Let it all fall down, down on me yeah
