

Endless

Shapeshifter

Toss and turn it up till dawn
Still can't rest my head, can't rest my head
Patiently I wait for sleep
But like a knife ##### cut me #####

Turn this night right upside down
My world is at an end, I made a mess
If you took it right, then all day
You won't get to see just what it is

It's lying here and now
All I feel said #####

As the light ##### and the night #####

All I need is to ease the mind
As you sleep away ##### miles away
Shadows ##### flicking down my side (sight?)

to have and it's worth #####
Than there's more that we thought we could be
All the time we shared has been #####
All this smoke it's cleared from my eyes

It's lying here and now
All I feel said #####
