

Could You Would You Should You

Shaun Baker

If you could be king
Of all you survey
Only just for one day

Would it be good if you knew that you'd could?
Change your world for better

We all tend to dream
What wonders we have seen

We should take care of the things that are good
Don't you think now is the time that you should
Could you, would you, should you
Be caring
Could you, would you, should you

The world needs you now and you need it too
Whichever whatever be good and be true
Could you, would you, should you (repeat)

Making a change you'd know that we could
Every day we have the power
Making a difference is all up to us
Change a world forever
And what would we do
For better or worse we choose

We should take care of the things that are good
Don't you think now is the time that you should
Could you, would you, should you
Be caring
Could you, would you, should you

The world needs you now and you need it too
Whichever whatever be good and be true
Could you, would you, should you (repeat)
