

# One More Reason

Sheena Easton

I love you so much baby  
I just can't believe that by the end of each day  
Somehow you're giving me  
One more reason to love you  
Like the way that you smile  
Or the way you brush the hair from my eyes

You give something  
That I never thought I'd ever have  
And when you send me that look  
You know I've got to add  
One more reason to love you  
I'm running out of numbers counting up to heaven

Love never felt so right for the first time in my life  
All I know is baby

Every day you're giving me  
One more reason to love you  
And baby when you smile all I see is one more reason to love you  
You give me, you give me, you give me reason  
One more reason

The way you laugh  
The way you smile  
The way you call my name  
And even if we're all standing in the pouring rain  
Nothing could suit me better  
Just as long as we're together  
For the first time in my life  
Love never felt so right  
Cos all I know is baby

Every day you're giving me  
One more reason to love you  
And baby when you smile all I see is one more reason to love you

When I lay down at the end of the day  
I feel so lucky  
I hope I'll always find the words to say  
How much I love you

One more  
One more reason  
One more  
Just one reason  
One more  
One more reason  
One more

Every day you're giving me  
One more reason to love you  
(One more reason)  
And baby when you smile all I see is one more reason to love you

Every day you're giving me  
(Everyday)

One more reason to love you  
(You give me reason)  
And baby when you smile all I see is one more reason to love you

Every day you're giving me  
One more reason to love you  
And baby when you smile all I see is one more reason to love you  
(You give me reason)

Every day you're giving me  
One more reason to love you  
(I'm living only for you)  
And baby when you smile all I see is one more reason to love you (You are my  
reason)  
(You are my reason)

Every day you're giving me  
One more reason to love you  
And baby when you smile
