

# You've Learned To Live Without Me

Sheena Easton

You've learned to live without me  
I'm just a memory  
A torn page in your history  
A shadow in the night  
When you turn out the light  
You've learned not to dream about me  
You've learned to live without me

I'm just another time  
Yesterday that you left behind  
A candle in the rain  
Yesterday forgotten flame  
That rainy day has finally found me  
You've learned to live without me

I hear you're doing fine  
Found other things to take up your time  
You probably don't remember  
Ever loving me  
We danced through all those days together  
I thought that dance would last forever  
Funny how forever fades away  
You've learned to live without

I hear you're doing fine  
Found other things to take up your time  
You probably don't remember  
Ever loving me  
We danced through all those days together  
I thought that dance would last forever  
Funny how forever fades away  
You've learned to live without me

You've learned to live without me  
I'm just a memory  
A torn page in your history  
A shadow in the night  
When you turn out the light  
You've learned not to dream about me  
You've learned to live without me

But no matter what i do  
I can't seem to learn to live  
I can't seem to learn to live  
Without you
