

## Call It Love

Shenandoah

Now you caught my eye without trying girl  
You stole my heart away, from clear across the room  
And somehow it was plain you felt the same  
Looking back now we can't say exactly how we knew

All a wise man needs  
Is one glimpse of destiny

There's an ancient fire deep in every heart  
That no one but that perfect match can start  
Like a bolt of lightning flashing in the dark  
When fate lights forever up call it magic, call it love

Until that night, love at first sight  
Was just a childish fantasy, like wishing on a star  
If you ask me now, don't ask me how  
All I can say is I believe, the proof is in the heart

Natures strongest source  
Will always take it's course

There's an ancient fire deep in every heart  
That no one but that perfect match can start  
Like a bolt of lightning flashing in the dark  
When fate lights forever up call it magic, call it love

There's an ancient fire deep in every heart  
That no one but that perfect match can start  
Like a bolt of lightning flashing in the dark  
When fate lights forever up call it magic, call it love
