

I Will Know You

Shenandoah

It could be anywhere, on some crowded street
I'll turn around, you'll turn around
And our eyes will meet
On a plane, at a party
Through a friend of a friend
It's gonna happen, I just don't know when
In all my dreams I've held you
Down in my soul I've felt you
So when you finally come along

I will know you
Something about you will speak to my heart
'Cause you're the one who's
Been calling to me from across the stars
By the look on your face, anytime, anyplace
So I will know you

There's so much love inside me I want to give
To the one, the only one, I'm gonna share my life with
And when I doubt, when I'm lonely, I just got to hold on
'Cause if I'm true to this feeling
Surely it won't be long
I'm gonna find you one day and it will be worth the wait
Before you even say your name

I will know you
Something about you will speak to my heart
'Cause you're the one who's
Been calling to me from across the stars
By the look on your face, anytime, anyplace
So I will know you

You're out there somewhere and I believe
Angels in heaven will lead you to me
I'll turn the corner and there you'll be

I will know you
Something about you will speak to my heart
You've been calling to me from across the stars
By the look on your face, anytime, anyplace
So I, oh I, oh I will know you
