

## Name & Number

Shift K3Y

See this girl from across the room  
She's the type to make you lose your cool  
Kinda hard not to recognise  
She's with another guy  
I can see that she don't even care  
If she's not allowed  
Oh, and it hurts to know  
A love like this is underground, tell me, do you hear me?

[Chorus x2:]

Lady, leave your name and number  
On my body so that I won't forget ya  
Blinding lights, fill your eyes  
I won't think twice, I want you like no other

It's impossible to hide us  
Even though he bought you diamonds  
Just say the word and I'll come to rescue you  
Cause he just wants to keep you silent  
You need to know that I've been told  
The things he does when you're not around  
And I believe that you just need some time  
To fool around

[Chorus x2:]

Lady, leave your name and number  
On my body so that I won't forget ya  
Blinding lights, fill your eyes  
I won't think twice, I want you like no other

I don't want you to be alone at night  
I don't wanna see him make you cry  
All I want is a simple thing  
To remember you by  
And baby you know whenever you're low  
That you can call on me  
So you give me yours  
And I'll give you mine

[Chorus x2:]

Lady, leave your name and number  
On my body so that I won't forget ya  
Blinding lights, fill your eyes  
I won't think twice, I want you like no other
