

Close The Door

SHINee

Baby it was crazy, last summer, the stars came down from the sky
In front of us, no inside your eyes
Dreaming of forever, I imagine our future every day
Warmly, like that, we promised to be together till the end

When I think of those words, I can't understand you right now
If you really want me, open your heart completely and accept me
I would give you my everything, everything in my dreams and future
But you keep opening and closing, please accept me now

When I see you in my dreams, I think you are the one girl
You know too, what your dreams point to is my world
I'm right here, stupid, you're so blind, you'll regret it
You can't read my heart or our destiny but I can't leave

When I think of those words, I can't understand you right now
If you really want me, open your heart completely and accept me
I would give you my everything, everything in my dreams and future
But you keep opening and closing, please close me now

Some day, you'll get to know me baby
Later on, you'll open up to me

In the sky, there is a door that is me, an automatic door that
only opens to you
I'll become a pass to get into your eyes that are looking at me
I know how to get to you, I'm taking a breath and running
I'm all ready, come to my side, close your eyes

I would give you my everything, everything in my dreams and future
But you keep opening and closing, please close me now

Baby please close the door in your heart
Someday you'll realize everything that you lost
