Kissing the sun

Since the day we met, I've been in love with you
Continuously adding to the things I treasure the most
Holding hands in the sunset like a happy rainbow
Like this love song, this love song
Even if more than a thousand years pass
You'll still have all my love

I want to protect the future of this world where you are
Forever kissing the sun, kissing the sun
This world becomes pleasant every time you smile
Forever kissing the moon, kissing the moon
Come on, kissing the sun

Even if things continue to fall apart
It's alright because I am here
If by chance tears start to flow from your eyes
I will change your tears into sweet candies

Please believe me now
For I give you all my love

I want to protect the future of this world where you are
Forever kissing the sun, kissing the sun
This world becomes pleasant every time you smile
Forever kissing the moon, kissing the moon

Please let this feelings reach you
Come with me, my only baby
Let me stay reflected
In the pupils of your eyes

I want to protect the future of this world where you are
Forever kissing the sun, kissing the sun
This world becomes pleasant every time you smile
Forever kissing the moon, kissing the moon
I want to protect the future of this world where you are
Forever kissing the sun, kissing the sun
Kissing the sun
