

Together

Shirley Bassey

Since you've been gone I'm feeling blue
I think of me, I think of you
So many things we used to do together
Feeling the way I do today
I can't remember yesterday
You said that we would always stay together

I walk the city streets alone
Cold as the coldest city stone
Go to the places we have known together

I tell myself that nothing stays the same
I'm behaving like a kid just out of school
I'm just a fool

Deep in the night I call your name
Dreaming that you are back again
No one is there to ease the pain without you
Maybe it's fate we had to part
Sorrow is sweet so when we start
Meeting again you know, my heart, I love you

I see the faces stop and stare
In every window everywhere
Oh, how I wish that we were there together
What has been done is dead and gone
Can't we forget nobody's won?
Isn't it time for us come together?

I tell myself that nothing stays the same
I'm behaving like a kid just out of school
I'm just a fool
