

No Logic

Shout Out Louds

I know it's out there
I can feel my body shaking
Can't be still

And I know there's no logic
No explanation for anything

I know exactly how it felt
Can't forget the shape and the silhouette
And I know there's no logic
No explanation for anything

And I just want this pain out of my chest
Want you to be my first breath
I just want this pain out of my chest
So listen
I don't wanna get in the way
Of making something great

I wish I'd walked the other way
And kept my thoughts out of your way
But I know now there's nothing
Nothing I can do to make a change

I know it's out there
I can feel my body shaking
Can't be still
And I know there's no logic
No explanation for anything

And I just want this pain out of my chest
Want you to be my first breath
I just want this pain out of my chest
So listen
I don't wanna get in the way
Of making something great

And I just want this pain out of my chest
Want you to be my first breath
I just want this pain out of my chest
So listen
I don't wanna get in the way
And I just want this pain out of my chest
Want you to be my first breath
I just want this pain out of my chest
So listen
I don't wanna get in the way
Of making something great
