

Well you've been watching what you think you like
But I know what you don't
You think it's all just playing, fun and games
You're treating it like a joke

Some people say they wanna be me
This life can be very deceiving
It's just your state of mind
Some people say they wanna be me
This life can be very deceiving
Things just come crashing down

You better watch what you say
You might get what you're asking for one day
Some people say they wanna be me
This life can be very deceiving
Things just come crashing down
Where's your fucking backup now?

Well I've been looking and you're very wise
You don't have what it takes
You taste a little bit
And you can't handle it
Now you're about to break

Some people say they wanna be me
This life can be very deceiving
It's just your state of mind
Some people say they wanna be me
This life can be very deceiving
Things just come crashing down

You better watch what you say
You might get what you're asking for one day
Some people say they wanna be me
This life can be very deceiving
Things just come crashing down
But where's your fucking backup now?

You better watch what you say
You might get what you're asking for one day
Some people say they wanna be me
This life can be very deceiving
Things just come crashing down
But where's your fucking backup now?
