## **Dream On**

You are the one that I had come To love and cherish so well through those years I hope one day we could return Back to the day when it all just began

Alone every night though how sad it seems I go back in time when I was yours and you're mine I long for a chance where I just can go on And hold you so close here in my arms again

So I just dream on to get me through each night I close my eyes and then I'll take flight For in my dreams, I'm never alone Cause I have you there to call my own

All that I lived and breathed was you Yes, I remember how love could have been A wounded soul since you've been gone All torn and shattered, my heart needs a home

Alone every night and so sad it seems I go back in time when I was yours and you're mine I long for a chance where I just can go on And hold you so close here in my arms again

So I just dream on to get me through each night I close my eyes and then I'll take flight For in my dreams, I'm never alone Cause I have you there to call my own

So I just dream on to get me through each night I close my eyes and then I'll take flight For in my dreams, I'm never alone Cause I have you there to call my own

So I just dream on to get me through each night I close my eyes and then I'll take flight For in my dreams, I'm never alone Cause I have you there to call my own

I'll just dream on Woo hoh Ooh, dream on
