Here is my peace in darkness and cold Here in the sleep where you can behold Angels are singing Praising your grace Blessing at dawn the grave without name

Hold me here in the deep
'cause when I wake the pain is too real

This is the pain that no one should feel
To let go of a child and everything dear
Stay with me please
'till dawn and light
Just let me sleep with my ghosts tonight

Drawn me into sleep Hold me there with you Let me dream you alive Hush now come smile at me

Here is my peace Here in the deep Stay with me Please let me sleep

Here is my peace Here in the deep Stay with me please Just let me sleep

Here is my peace in darkness cold Here in the sleep you behold This pain that no one should feel To let go everything dear

Here is my peace Here in darkness and cold Here in the sleep where you can behold Cradle is empty yet swinging tonight Cradle of nameless is burning tonight

Here is my peace
