

One Last Time

Simon Webbe

We were so precious we were made of gold
We had more love than we could ever hope
You left me hanging out here in the cold
We were solid as a rock is
I guess another body turned your head
But did you have to go and share our bed
I believed in every word you said
Broken promise, let's be honest

I made our love, love, love feel lonely
Still wanna be your one and only
You've got my number come on call me
I'm going out my mind

I made our love, love, love feel lonely
Wishing on a star up above me
So come on over and just hold me
For one last time

I don't expect for us to work it out
But I still live in hope of turning it round
Both our hearts together built this house
We were solid as a rock is
I see a new car sitting on the drive
You've got a dress on I don't recognize
There's a fire burning in your eyes
If I'm honest I'm so sorry

I made our love, love, love feel lonely
Still wanna be your one and only
You've got my number come on call me
I'm going out my mind

I made our love, love, love feel lonely
Wishing on a star up above me
So come on over and just hold me
For one last time

Ooh yeah, life is full of highs and lows
I can't help it if it shows
Can somebody please explain
How I live with what remains

I made our love, love, love feel lonely
Still wanna be your one and only
You've got my number come on call me
I'm going out my mind

I made our love, love, love feel lonely
Wishing on a star up above me
So come on over and just hold me
For one last time
