

## Here With You

Sing It Loud

I stand alone  
Lost on an empty road  
Too many miles beneath my feet  
Have worn into my soles  
And if it takes a lifetime just to learn  
I plan on skipping school  
Because there's not a damn thing in this world  
That can keep me away from you

Because I'm here with you  
I've spent a life away  
And now I'm here to stay  
And do all things you want me to  
I'm here with you  
Because no one else  
Will let me be myself  
And feel the way I do when I'm with you

As I walk your busy streets  
Tequila shots within my reach  
The wind plays on my back  
It holds me as we laugh  
At the stupid things we used to do  
The time we played First Avenue  
And how we're missing you

Because I'm here with you  
I've spent a life away  
And now I'm here to stay  
And do all things you want me to  
I'm here with you  
Because no one else  
Will let me be myself  
And feel the way I do when I'm with you

Barely waking up from last night  
It's hard to do with tired eyes  
Every day is something new  
I just want to be with you  
With you, with you, with you

Here with you  
I've spent a life away  
And now I'm here to stay  
And do all things you want me to  
I'm here with you  
Because no one else  
Will let me be myself  
And feel the way I do

Because I'm here with you  
I've spent a life away  
And now I'm here to stay  
And do all things you want me to  
I'm here with you  
Because no one else  
Will let me be myself

And feel the way I do when I'm with you  
With you
