

We Fall Down

Skye

Don't get me wrong
You always had me fighting
For oxygen
In the beginning it's so exciting

We felt the heat
Just you and me
We let it take us
We were the embers

Rising leaving the crowd underneath us
I could've swore we were rising
Flying higher and higher like spacemen
I really though we were flying

We fall down ,down ,down ,down
Down, down ,down ,down

Don't get me wrong
You always had me crying
Tears of fun
Just wish I knew how to reignite it

And feel the heat
Just you and me
We let it take us
We were the embers

Rising leaving the crowd underneath us
I could've sworn we were rising
Flying higher and higher like spacemen
I really though we were flying

We fall down ,down ,down ,down
Down, down ,down ,down

Deeper and deeper we're falling through the ground
Straight to we break through the other side and out
Until we're

Rising leaving the crowd underneath us
I could've sworn we were rising
Flying higher and higher like spacemen
I really though we were flying

Rising leaving the crowd underneath us
I could've sworn we were rising

We fall down ,down, down, down
Down,down ,down ,down
Down,down ,down ,down
Down,down ,down ,down
