

## Heirlooms & Accessories

Skyzoo

Hand off like it was potent  
Or like it was emotions or like it was reloaded  
Or like it was the start of what you was starting to go with  
And as soon as you started it every part of you noticed  
Coupes out in front of the 'jects tall numbers  
Or cooped into whatever's left that they bought from us  
Shop don't close 'cause the neighbors change  
Same way cops know to roll when the date say  
The 1st to the 3rd a g-pack could make it all seem better  
Until it's paddy wagon car seat weather  
That's year round the thought of who's here now interrupting a sale  
Or pulling up on a Citibike and wanting some crills  
It's all basic Venmo begging call it patience  
Know if you get caught up with them the call changes  
Dusse by the cases do say what's the wagers  
And please do believe they do say what your name is for real

Call it heirlooms and accessories  
And peep how they all hang so pleasantly  
Now go pass that to who you love  
And tell 'em to treat that like weaponry for real

Two states over to stay up under  
Numbers ain't matching but you can still make these wonders  
Like wonder if all of these pieces is still shooting  
Checking on a meter to see if one of them thru with  
All of 'em get to moving so you moving  
Swindling a store like swindling an award  
I'm more Issa Rae if we're sorta the same Ima support  
And carry all of that with me to the door  
Like carrying last names  
Or carrying a pistol for the minute that bag came  
And opening the bag to see it's nothing that bag claimed  
And carrying the calling of them seeing their last days  
Unless that bag change  
Or carrying honor like you carried a stance  
Or being asked by your neighbors if you can carry your man  
With 5 others don't nothing surprise none of us  
So whoever surprised would kill to come outside and live beside one of us Ti  
l it come to the numbers  
And one of those 5 get called to jump up inside  
That pine and you get to running like f\*ck it  
It's prolly safest to just live it off a playlist  
And tell us how it provided inspiration  
I'm inspired by knowing that pots really work  
Shots really turn a starter into a martyr if the top send a word  
And word be in the air like picturing what you heard  
And know whoever's looking is listening to it first you heard?

Call it heirlooms and accessories

Consider what just occurred  
All that could be got and the feelings that could emerge  
And they said that they get it but to see what it be worth  
Is asking for them to see off of the curb  
'Cause they saw it but all of them told me they got it from here  
Long as they're dealing with product in here  
Know the whole line up is bout it in here  
Won't no one ever have problems in here  
All of these baggies they got up in here?  
f\*ck could they ever be worried about?  
Snipers is on swipers is on  
Shit is like they never heard of a drought for real  
Like "what the lick read? We just want everything lit B  
As long as you kick it at this speed we can relate to all this G's  
Trapping up out of an M3 light work til the Range come  
We be out here with the right work light work shit is A1"  
And so I heard it all and replied I bet you I know it too well  
Catching a lick is a high you just gotta know when you fell  
Fell into a bag that you can flip into a couple more  
Now you in your bag and shit is hitting like you f\*cking thought  
"He said that's just what I mean" and he got to popping a zan  
He got a spot up in reach he said he got him a plan  
Plan goes "anything goes when opportunity knocks  
Fam knows we gonn' let it go do what you do if it pops!"  
They get to spotting the vics Balenciaga's is lit  
They in the spot with the stick like "ayo they got it to give  
So ayo they gotta get got" they get to rolling and rocking the spot  
Do it and get in and out with the grips  
Neighbors is watching the property drop  
Snaps is litty mixing the Dusse with Henny  
Hammers tucked under the Fendi neighborhood know you get busy  
But that neighborhood ain't a gimmie it ain't been yours in a while tho  
Same custi's on citibike's is pointing out pictures with 5-0  
And all of the change that you saw  
That you igged cause you thought  
Would never change how you're on is everything you knew par  
It's everything they shoot for based on what you're here for  
They never could've been more right if your type is to hear wrong  
Heirlooms and accessories all hang so pleasantly  
Pass that to who you love treat that like weaponry
