

Kill Your Parents

Slapshot

Brought me into this world now I take you out You've been in control my entire life Now I'm the one that's in control And I'll give you something to cry about Say your prayers it's time to die Plead and beg let's hear you cry You never wanted me that's what you said A better life for you if I was dead Now that I'm the one that's in control With a gun right at your skull let's make a hole Say your prayers it's time to die Plead and beg let's hear you cry If I believed Everything you ever said I would have gone to the edge And jumped right to my death But now the tables Have turned on my old friend For years and years and years I've wished that you were dead Kill your parents Kill your parents Kill your parents Kill your parents
