

# Lost Without You

Sleeperstar

I saw you losing faith  
I saw a fading fire  
Flicker flames of every time we came out as the sole  
survivors  
And when I went too far  
And then you came to follow  
You pulled me from the edge  
Thought I was too far to save

I would be lost without you  
You are the sun that keeps my darkness at bay  
I would be lost without your love  
You know that I would be lost

Step back from bridges edge  
Step back from blind emotion  
Your voice, insisting echoes, ringing always in my head  
A life I left behind  
A life I never wanted  
Oh dark and deadly ends  
My demons wait for me

I would be lost without you  
You are the sun that keeps my darkness at bay  
I would be lost without your love  
You know that I would be lost

I would be lost without your love  
I would be lost without your love  
I would be lost  
I would be lost

I would be lost without you  
You are the sun that keeps my darkness at bay  
I would be lost without your love  
You know that I would be lost

You know that I would be lost
