

Better not wait too long
To get where you're going, it's a rocky road
With sunshine and blue skies almost every day
The way that you're living, there's a price you pay

I'll fall into the ocean while we're searching for the sun
Or walk a million miles just to be the only one

It burns like fire, fire below
Don't need a reason for heaven to know
That we are higher than ever before
Don't need a reason for heaven to know

The sky's never been so close
When life's this good and it's by the coast
And higher I take you, hold my hand and we'll float
If you fall I'll get you, have no worries no more

I'll fall into the ocean while we're searching for the sun
Or walk a million miles just to be the only one

It burns like fire, fire below
Don't need a reason for heaven to know
That we are higher than ever before
Don't need a reason for heaven to know

On a weekday, I'ma take you higher on the weekend
I'ma take you higher on a weekday
I'ma take you higher on a weekend
I'ma take you higher on a weekday
I'ma take you higher on a weekend
I'ma take you higher on a weekday
I'ma take you higher on a weekend

It burns like fire, fire below
Don't need a reason for heaven to know
That we are higher than ever before
Don't need a reason for heaven to know

It burns like fire, fire below
Don't need a reason for heaven to know
That we are higher than ever before
Don't need a reason for heaven to know
