

# One More Night

Slightly Stoopid

I watch the lights, them fade away  
Doesn't seem so long ago when all your life was but a dream  
Seems like nothing new to me  
Pack your bags again, you know it's time to leave  
Watch the tears run down your face  
Yes I needed you to see  
It's hard to be another place  
When I need you here with me

One more night and then I'm home  
Sleepless nights out on the road  
And all these days have come and gone, still pass us by  
One more night and then I'm home

I've seen the light shine through your eyes  
For the days don't seem as long when I think of you awhile  
Another day, another try  
When I call you on the phone, let you know I'm still alive  
I'll bring the storm and calm the fire in your eyes  
It won't be long until I hold you  
Yet my mind, it won't unwind until it's right  
And all the things I should have told you

One more night and then I'm home  
Sleepless nights out on the road  
And all these days have come and gone, still pass us by  
One more night and then I'm home

One more night and then I'm home  
Sleepless nights out on the road  
And all these days have come and gone, still pass us by  
One more night and then I'm home
