

## A Shot in the Dark

### Smash Into Pieces

Born alone and nameless  
Neath a crimson sky  
We'll learn to fly  
One day

No one to hold on to  
Ain't nobody's son  
But I'll reach that sun  
One day

A shot in the dark  
This is all we are  
A shot in the dark  
Little lonesome stars  
You shine in sunless skies  
A shot in the dark  
Before we die

Call off all your angels  
I don't need no help  
When I go thru hell  
It's all me

This life has left me faithless  
I got here without gods  
And here among the stars  
I'll stay

A shot in the dark  
This is all we are  
A shot in the dark  
Little lonesome stars  
You shine in sunless skies  
A shot in the dark  
Before we die

Can you even see me  
In the middle of the dark night  
(I want you to come find me there)  
Can you even hear me  
As I'm screaming out

You shine in sunless skies  
A shot in the dark  
Before we die
