

Greed and money  
They fuel the fire in your eye  
The only thing that makes you shine  
It must be lonely  
Being perfect all the time  
The only one that's always right

As you take and take and take and take  
You, you may know everyone  
You may have everything  
You live your life for fun  
Woah, woah  
But we are bruised and broken down  
And no matter how it hurts  
The pain won't stop us now  
And that's what makes us real  
And that's what makes us real

You've raised an army  
And have the masses by your side  
To praise your name and wear your stripes  
You'll never own me  
I'll never buy into your lies  
The only thing I know is fight

As you take and take and take and take  
You, you may know everyone  
You may have everything  
You live your life for fun  
Woah, woah  
But we are bruised and broken down  
And no matter how it hurts  
The pain won't stop us now  
And that's what makes us real  
And that's what makes us real

You, you may know everyone  
You may have everything  
You live your life for fun  
Woah, woah  
But we are bruised and broken down  
And no matter how it hurts  
The pain won't stop us now  
And that's what makes us real  
And that's what makes us real

And that's what makes us...
