

# Needles and Kin

Soilwork

Sentinel of the retribution  
Summoner of the dying light  
Guardian of the grand delusion  
Phosphorus and apatite

She's observed you  
From the other world  
She has heard you  
Every world unfurled

Soon she is coming  
Soon she'll descend  
First we're devolving  
Then we'll ascend  
And I know if s the only way out of here  
That lies ahead  
And I know that she will get us off  
This planet of the dead

Oversight of the everwatching  
Vigilance of the seldom seen  
Sulphurous dawn is soon approaching  
Promises of what might have been

Unshed tears  
Cascading from her interstellar space  
Disconnected from the earth  
And all that we embraced

She's observed you  
From the other world  
She has heard you  
Every world unfurled

Soon she is coming  
Soon she'll descend  
First we're devolving  
Then we'll ascend  
And I know if s the only way out of here  
That lies ahead  
And I know that she will get us off  
This planet of the dead

She's observed you  
From the other world  
She has heard you  
Every world unfurled

Soon she is coming  
Soon she'll descend  
First we're devolving  
Then we'll ascend  
And I know if s the only way out of here  
That lies ahead  
And I know that she will get us off  
This planet of the dead
