

## House Fire

### Someone Still Loves You Boris Yeltsin

We did what we could  
To save this house from falling  
But it burns because it's wood  
And now you'll never call me darling

I coughed your name  
I smoked all day  
And I slept myself sleepy  
I was sleeping it away

Don't let it burn  
Don't get confused  
Don't let it get to you

We did what we could  
To save this car from crashing  
Your pretty face is soaked in blood  
You know, I still find you dashing

Airbag suffocates  
You need a little space  
The rain on the windshield  
I watched you limp away

Doesn't it have to hurt?  
Don't get confused  
Don't let it bother you  
Don't try to call  
You'll lose it all  
You get used to her bad news,

It's just bad news
