

I'll Be There

Something With Numbers

I'll wear the smile that you gave me, always
I'll wear it so contagiously all day
I'd do almost anything that you say
I'd be away for centuries and you'd wait

I need you, to be, with me
And I'll be there
When you need me

I'll be there for you girl
I'll be there for you girl
Night and day, now and then
I'll be there

I know I haven't been myself lately
It's hard for you but please don't do anything crazy
My head is in a different place, please don't blame
My heart is where it's always been put away safely

I need you, to be, with me
And I'll be there
When you need me

I'll be there for you girl
I'll be there for you girl
Night and day, now and then
I'll be there

You're like a melody that I can't get out of my head
I like how it torments me and keeps swimming in my head
And I just want to sing it
To anyone who'll listen
It's tickling my thoughts
Like you. like you

I'll be there for you girl
I'll be there for you girl
Night and day, now and then
I'll be there
