

Citylights Forever

Sophie Hunger

In Berlin there is a project waiting holding wearing a pole and
tucked and disposed

and i wish there were two little bolts on the locks so I could
play with each other

Me a question comes to me head should I watch monty python like
the memory of the dead millions and trillions who've have never
had any time

and the prophet from next door set the stone in your hand holding
your hand and I do understand and I don't understand I just
wish I was standing in the middle of a mountain

when a dream comes empty when I move I'm taught when I think of
a girl in the world and no she won't be enough

city lights, city lights city lights forever

And I wish there is a god and if there is not still I find myself
hoping and pleading a lot In the sea and the dawn showing a
spots And take her down to the women in bed

when a dream goes empty When I move I am taught When I think of
a boy in the world and no, he won't be enough

Citylights, Citylights Citylights forever

Ci Ci Ci Ci City lights my City forever
