

We Are Not Alone

Soulitude

I'm looking for a new place to reborn
So far beyond the sun
I lost my faith in this rotten human kind
Goodbye to all my mission has begun

Turn all the engines on
Countdown and here we go

I sail the stars throughout the galaxies
To dive into the unknown
There's no reason for a fight I come in peace
Another world another chance will come

And if I were to fail
Don't cry for me my friends

Faster than the speed of light I cross the skies
Searching for a place to be my home
Somewhere in the space there must be other lives
Let me show you we are not alone
