

Let The Night Take Over

Soulsister

Now at last we find ourselves alone
Dim the lights and disconnect the phone
Baby let your heart run free
We can make it all work out on our own

So let the night take over
Let it carry you away
There's nothing to be scared of
Nothing to beware of
Let the night take over

I've waited for this moment for so long
Take it up for soon it will be gone
Baby let me hold you know
You can put away your cares
from now on

Just let the night take over
Let it carry you away
There's nothing to be scared of
Nothing to beware of
Let the night take over
Let it make you want to stay

Now at last we find ourselves alone
Here with you I'm right where I belong
Baby let me hold you know
We can make it all work out on our own

So let the night take over
Let it carry you away
There's nothing to be scared of
Nothing to beware of
Let the night take over
Let it carry you away
Let the night take over
Let it make you want to stay
